High Power & Performance

Powerful Engine

HMC BETA Engine

Market approved quality of HMC BETA engine ensures incomparable performance, durability and additional value to the machine. 37kW of the engine is more than enough to suit any work, not just with normal 37kW but with special attachments requiring high power as well.

37kW/2,450rpm

State-of-the-art hydraulic system

The latest large-capacity hydraulic system reacts quickly during operation, and a low-noise control valve increases both efficiency and durability.

The new master on the job-site!

Smooth running, efficient and ergonomically designed, 15L/18L/20LA-7, 15G/18G/20GA-7 series are made to meet your needs.

Fast and stable performance

Being able to quickly raise and lower the mast, as well as tilt it forward and backward, provides the best operational conditions during unloading. When the truck is fully loaded, mast lowering speed is carefully controlled to ensure safety by the down control valve.

Faster travel speed & Gradeability

The powerful high-output engine provides greater acceleration, better gradeability and faster travel speed on any tough terrain or slope.

Gradeability(MAX)

15L-7 / 15G-7	: 37%
18L-7 / 18G-7	: 33.1%
20LA-7 / 20GA-7	: 31%

Travel speed(MAX)

15L-7 / 15G-7	: 20.3km/h
18L-7 / 18G-7	: 20.3km/h
20LA-7 / 20GA-7	: 20.3km/h

Increased mast tilting angle

Utilizing the mast tilting angle of 6 degrees forward and 10 degrees backward, the operator can safely and rapidly perform loading and unloading jobs.

Wet disc brake system

The adoption of Wet disc type brake improves brake performance. Brake pedal effort is improved about 45% at 20% slope and Wet disc brakes have service intervals 5 times longer than conventional.

Fully hydrostatic power steering

A hydraulic steering system always guarantees smooth and flexible steering, preventing overrun and kick-back.

OPSS (Operator Presence Sensing System)

Control of mast tilting, lifting and lowering is not possible through operation of the appropriate control when the operator is not in the normal position. (Option)

Comfortable Operation

Adjustable steering wheel

Steering wheel with horn button can be adjusted by a lever on the right-hand side for the most comfortable operator position.

Easy and safe shift lever

A single lever on the left side of the steering column gives the operator fast, easy control of direction. The engine can be started in case of neutral position of this lever.

Multi-function switch lever

Multi-functional switch lever gives easy access to lights and horn.

Quick response of operating control levers

Only minimal operator's effort is required for precise, safe and productive control.

Ergonomics driving space design!

A design based on human engineering relieves fatigue and increase operator's efficiency.

■ Some of the photos may include optional equipment.

Ergonomically positioned pedals

Based on human engineering, the accelerator, brake and inching pedals are optimally positioned for convenience while operating the equipment.

Cup holder & console box

Additional storage spaces are located inside the operating space for operator's convenience.

New high visibility for safe operation

The operator is able to work with increased safety and accuracy due to a wider view mast.

Easily adjustable suspension seat

An attractive and adjustable seat, based on a human engineering design, provides great comfort, safety and durability.

Full-floating headguard mount

The anti-vibration rubber is installed between the guard and truck frame to reduce the source of vibration and noise while driving. This not only reduces operator's fatigue but also increases safety.

Endurance & Safety

Strong overhead guard

The safety overhead guard meets EEC and ANSI regulations and protects the operator during hazardous jobs.

Parking brake

Ratchet type parking brake requires less efforts from the operator to set.

Highly durable split type drive axle

Powershift transmission provides fast travel speed and quiet travel under any heavy load condition, and boosts work efficiency.

Danger-free through high durability!

Safety and durability are priorities in the design of the equipment.

■ Some of the photos may include optional equipment.

Large footboard & Hand grip

Wide "open" step offers convenience and safety when entering and exiting truck.

Heavy duty single unit frame

Heavy duty single unit type frame, designed on the basis of accurate structural analysis, guarantees durability and safety.

Improvement in maintenance of electric parts

Various electric parts are centralized in dash board resulting in improve-ment in maintenance

Expansion bellows

The expansion bellows absorbs vibration and reduces noise generated from the exhaust gas system and also extends the life cycle of exhaust gas system.

Bright, protected headlights

Bright, protected headlights are positioned for exceptional visibility.

Ground clearance

The engine and transmission are assembled horizontally and positioned high in the frame to protect expansive components during operation on rugged surface.

Durability **Easy** Maintenance

Electrically monitored air filter

Air cleaner sensor alerts the operator of a restricted air filter and allows replacement before damage.

Aluminum radiator with superb protection against heat

Battery master switch

An accessible, compact fuse box for easy inspection

Centralized design for easy service!

An ideal arrangement of component parts ensures easy accesses and conveniences for the maintenance.
